

Your Family Pays the Price for the The Ryan Healthcare Plan

Three black and white portraits of people are arranged vertically, each framed by a gear-shaped cutout. The top person is a man with a goatee, the middle is a woman with blonde hair, and the bottom is a man with a beard and glasses wearing a baseball cap.

House Republicans are trying to pass the “American Health Care Act” (AHCA), a bill to repeal and replace the Affordable Care Act also known as Obamacare. This bill gives millionaires a \$50,000 tax cut, while insurance and pharmaceutical companies get hundreds of billions of dollars in tax breaks.¹

Good health insurance plans – like the kind that are bargained for in a union contract – will be taxed in 2025.²

They plan to tax our benefits and steal money from the Medicare trust fund—the same fund that all Americans, including hardworking UAW Members and their families, have paid into their whole careers, weakening Medicare for current and future retirees.³

The bill will take money away from Medicaid’s long-term care program, which helps 1 out of 7 retirees and pays for 2 out of 3 seniors long term care in nursing homes.⁴

In all, 24 million people could lose healthcare coverage and the cost of coverage for individuals could go up nearly \$1,500 a year, or as high as \$10,000 a year for older Americans.⁵

TAKE ACTION:

We need your help to push back against this threat to all UAW Members, Retirees, and their families. Call your member of Congress and tell them to oppose the American Health Care Act.
